

Dyets[®] Inc.

Quality, Service & Price

**Providing custom made
research diets
for over 30 years.**

1-800-275-3938

**New from Dyets Inc.
custom fresh food diets
for gut microbiome
research.**

Several years ago, Dyets Inc. was contacted by Dr. Michael Barratt, a researcher in Dr. Jeffrey Gordon's lab at Washington University, about the possibility of creating pelleted diets from fresh food recipes. The first recipe we worked on was based on the diet of Malawian children.

This study was published in the February 19, 2016 issue of Science. A modified version of this diet containing milk oligosaccharides was also made for them and the results of this study were published in the February 25, 2016 issue of Cell. Since then we have made many different fresh food diets for them.

***Examples of fresh foods that
have been used in diets:***

Spinach	Tomatoes
Mustard Greens	Green Beans
Peanut butter	Eggs
Bananas	Okra
Tilapia	Apples
Chicken	Peaches
Onions	Pears

We offer Customized:

Purified Diets
L-AA Diets
Cereal Based Diets
Liquid Diets
Sterile Diets
Ingredients
Feeding Tubes, Jars, &
Related Supplies
Vitamin and Mineral Mixers

All fresh food diets are
manufactured, pelleted, vacuum packed
and gamma irradiated to order.

Pricing would depend on
the type of fresh foods
used and the quantity ordered.

If you are interested in using fresh
food diets, Please contact
Shawn McGee at
shawn@dyets.com
and he will work up
diet formulations based
on your requirements.

OUR HISTORY

Dyets, Inc. was founded on July 1, 1979
by Howard L. Yowell and Donald H.
Yowell. Over the past thirty years, our
hallmark ability to design, prepare, and ship
custom diet formulations in a timely
manner while maintaining an aggressive
pricing policy has been well received by
investigators. We remain very grateful to the
many researchers who have chosen Dyets
during the past 30 years. A short list by
institution of our start up customers
includes: Cornell University, University of
Nebraska Medical Center, Wistar Institute
in Philadelphia, University of Pittsburgh,
and the University of Toronto.

Dyets has come a long way since being a
two-man operation. Since start-up, our view
of reinvesting in both equipment and
personnel is partially responsible for our
very low employee turnover rate. At present
time, Dyets six department leaders have
worked at Dyets an average of 15 years
experience with our company. We believe
speaking with an experienced Dyets
employee can smooth the bumps in the
road, and we are happy to share our
knowledge and expertise with every
customer.

– Donald H. Yowell, President
